

Check the Status of a Signing

You are emailed when all parties have completed a signing you created. If you have not yet received this notification, you can check the status of your signing to assess what action to take next.

Steps

1. Navigate to Signings.
The Signings page opens.

2. Locate the signing you need and view its current status.
3. To decide what action to take next, see the "Signing statuses" and "Signing actions" sections of "About signings (Authentisign)" for information on what signing statuses mean and what actions can be taken on a signing in each status.
